

We can duplicate existing parts, design new parts or work from existing designs to create bespoke parts.

CNC Machining

- Production of fully functional "one-off" parts in a wide range of plastics or metals on our in-house CNC Machine.

Rapid Prototyping

- Get your parts built and delivered in 3days* with our Dimension SST 1200 FDM Rapid Prototyping Machine.

Vacuum Forming Mold Design and Production

- We can create balsa wood, foam or polyurethane board molds for all of your vacuum forming needs.

Spray Painting / Finishing

- Our design team can make your prototype look like a product through the use of a wide range of professional finishing techniques.

*Depends upon part complexity and time of receipt of 3D CAD files.
